Alternate Thumbpicking

Alternate thumbpicking is a basic fingerpicking pattern that involves alternating the use of your thumb and index finger to pluck the strings. This

pattern is commonly used in traditional Hawaiian and folk music, and it produces a rhythmic and driving sound.

Travis Picking

Strumming Patterns

In addition to fingerpicking, strumming can also be used to create melodies on the ukulele. Strumming involves using a pick or your thumb to sweep across the strings, producing a percussive and rhythmic sound. There are countless strumming patterns that you can learn, ranging from simple to complex.

Downstrokes and Upstrokes

The most basic strumming pattern involves alternating downstrokes (moving your pick or thumb down) and upstrokes (moving your pick or thumb up). By varying the speed and rhythm of your downstrokes and upstrokes, you can create a variety of strumming patterns.

Syncopated Strumming

Syncopated strumming involves placing accents on certain beats within a strumming pattern. This creates a more rhythmic and interesting sound.

You can create syncopated strumming patterns by using a combination of downstrokes, upstrokes, and pauses.

Chord Progressions

Chord progressions are sequences of chords that provide harmonic structure to your melodies. In solo ukulele playing, chord progressions help you create a cohesive and engaging performance. There are countless chord progressions that you can use, each with its own unique mood and character.

Major Chord Progressions

Major chord progressions are commonly used in popular music, and they create a bright and uplifting sound. Some popular major chord progressions include the I - IV - V progression (e.g., C - F - G), the I - V - vi - IV progression (e.g., C - G - Am - F), and the I - vi - IV - V progression (e.g., C - Am - F - G).

Minor Chord Progressions

Minor chord progressions are commonly used in folk, blues, and jazz music, and they create a more somber and introspective sound. Some popular minor chord progressions include the i - IV - v progression (e.g., Am - Dm - E), the i - v - vi - IV progression (e.g., Am - E - F - Dm), and the i - vi - IV - v progression (e.g., Am - F - Dm - E).
