Print length : 1800 pages

The book is divided into four sections. The first section covers the general principles of surgical pathology, including specimen handling, fixation, and staining. The second section covers the pathology of the oral cavity, including the lips, tongue, floor of mouth, hard palate, and soft palate. The third section covers the pathology of the maxillofacial region, including the skin, soft tissue, bone, and cartilage. The fourth section covers the pathology of the salivary glands.

Each section is divided into chapters that cover specific diseases. The chapters provide a detailed overview of the clinical presentation, pathology, differential diagnosis, and treatment of each disease. The book is well-illustrated with high-quality photomicrographs and diagrams.
